LAMA SAFAR ALJUAID

Software Engineer

lamaaljuaid511@gmail.com | 0539702996 | LinkedIn | GitHub | My Portfolio

SUMMARY

Software Engineering student focused on System Architecture and Full-Stack development. Proven ability to translate requirements from 15+ stakeholder interviews into technical designs. Proficient in algorithmic problem-solving (35+ challenges solved) and seeking a COOP training to apply engineering rigor.

EDUCATION

Umm Al-Qura University (UQU), Third-Year Undergraduate — Bachelor of Software Engineering

GPA: 3.64/4.00

COURSES

Algorithmic Toolbox- University of California San Diego Coursera — **Jan 30, 2026**
Covered: Algorithm design, complexity analysis (Big O), greedy strategies, dynamic programming, and efficient sorting/searching implementations.

The Complete Full-Stack Web Development Bootcamp-Udemy — **Feb 22, 2026**
Completed an intensive 62-hour training program in Full-Stack Web Development covering the fundamentals and technologies of front-end and back-end web application development.

PROJECTS

Miran: Clinical Training Platform (Graduation Project) — **Academic Year 2025-2026**
Engineered a Full-Stack system by translating 15+ stakeholder requirements into UML models and architectural designs; implemented a scalable React/Node.js solution with Cloud SQL to automate complex clinical training workflows.

Tech Store Project - Developed a MERN e-commerce app featuring a Admin Dashboard for CRUD operations, integrating React and MongoDB for product and user management, efficiency 21.5%. — **Feb 2026**

User Data Management Project - Developed a Node.js/EJS application featuring robust CRUD operations and form validation to manage user records while ensuring data consistency and backend integrity, efficiency 58.5%. — **Mar 2026**

Library Management System (UML & Architecture) - Architected a Client-Server system by transforming real-user requirements into detailed UML models (Class, Sequence, Component) to define system behavior and technical communication structures. — **Dec 2025**

SKILLS

Software Engineering Skills:

- Requirements Engineering
- Software Requirements Specification (SRS).
- System Analysis & Design (UML).
- Software Architecture (NFR).
- Development Methodologies (Agile & Waterfall)

Technical Skills:

- **Languages:** Java, Python, JavaScript.
- **Web Development:** Node.js, Express.js, React, HTML, CSS, Tailwind CSS.
- **Database:** SQL, MongoDB.
- **Tools:** Git, GitHub, Postman.

PROBLEM SOLVING ACHIEVEMENTS

HackerRank — Problem Solving -3-Star Badge in Problem Solving, solving algorithms and data structures challenges**.**

Problem Solving (Basic) — HackerRank -Solved challenges involving fundamental algorithms and data structures using computational logic**.**

LANGUAGES

- Arabic
- English
